Connecting with your community is an important part of the Council's remit. Having a website will mean you will be able to inform your Community of events, business of the Council - by loading your minutes onto the website - and offer the wider public details of your village or town. You can even use it to recruit staff, link to other websites or place advertisements.

IDbuilder, from UKVillages, is a simple to use website template, which is being used throughout the country by other councils and community groups.

HAPTCo are hosting local training courses with tutors from UK Villages free for the first 50 Parish or Town Councils who apply.

**FOR MORE DETAILS PLEASE CONTACT HAPTCo: 01442 235317 or email: [info@herts-aptc.gov.uk](mailto:info@herts-aptc.gov.uk) - strictly first come first serve basis.**

\*For one year - hosting fee after the initial year is the liability of the Parish/Town Council. Approximate cost £50p.a.
